

LATERALLY STANDARDIZED STUFFED
POTATO FOOD PRODUCT AND METHOD FOR MAKING

ABSTRACT OF THE DISCLOSURE

A laterally standardized hollowed out potato has an opening through a wall of potato communicating with an interior cavity, with a filling within the cavity. When the potato is resting on one of its relatively broader sides, the opening faces upwardly, so that a liquidy filling is reliably contained. The laterally standardized nature of the potato facilitates mass production, as well as a consistent sidewall thickness.
